

Islem Azzouz

Cloud and DevOps Engineering Student | Final-Year Industry Placement

Tunis, Tunisia | +216 96 024 290 | islem.azzouz@esprit.tn

linkedin.com/in/islem-azzouz | github.com/islemazz | islemazz.github.io

Available from **January 2027** for a final-year placement of **at least 6 months** | Able to relocate to Cambridge or London

Profile

Final-year ESPRIT engineering student specialising in Cloud and DevOps. Built a production-tested payment-security platform at a fintech company (Python, Docker, GitHub Actions, Terraform, Azure) and a 7-node OpenStack cloud.

Technical Skills

Cloud and infrastructure: OpenStack, Azure, VMware, KVM, Kubernetes, Docker, Terraform, Ansible

CI/CD and monitoring: GitHub Actions, Jenkins, SonarQube, Prometheus, Grafana, Git

Programming and applications: Python, Java, Spring Boot, Angular, React, JavaScript, SQL, Flask

Security: 3DES key handling, JWT, RBAC, pfSense, OpenVPN, Snort, Nmap, Nessus

Databases: PostgreSQL, MySQL, MongoDB

Experience

DIGICOSER SARL — Engineering Intern, Sousse, Tunisia

July – September 2026

Python · Spring Boot · Angular · PostgreSQL · Docker · GitHub Actions · Terraform · Azure

- Built an automated Python/3DES pipeline that verifies payment terminal keys, cross-checking key check values from three independent sources.
- Diagnosed an undocumented ZMK key-wrapping layer that was failing every real file, and implemented the fix.
- Built a Spring Boot and Angular portal with 2FA, role-based access control, per-bank data isolation and a database-level immutable audit log.
- Containerised 5 services with Docker and GitHub Actions CI/CD, and wrote the Terraform config used to deploy to Azure; tested in production on 59 real files in a single run.

Enova Robotics — Immersion Intern, Tunisia

July – August 2025

- Independently built a web simulation of a UR10e robotic arm (React, Three.js, Spring Boot, MongoDB), delivered two weeks early; the R&D team adopted it and reported a 30% reduction in physical testing.
- Rigged the robot model in FreeCAD and Blender (joint hierarchy, GLB export) to animate all six joints in the browser.

Tunisie Telecom — Technical Intern, Gafsa

Summer 2023

- Supported router and switch configuration and network troubleshooting; resolved 3–5 incidents per day.

Selected Projects

Private Cloud Platform (OpenStack) — Team of 7, selected for ESPRIT's Bal des Projets

2025 – 2026

OpenStack · VMware · KVM · Ansible · Terraform · Kubernetes · GitHub Actions · SonarQube · Prometheus · Grafana

- Built a 7-node OpenStack cloud (1 controller, 2 storage, 4 compute) delivering IaaS, PaaS and SaaS; led compute-node deployment and owned the Ansible automation.
- Delivered CI/CD with SonarQube quality gates plus Prometheus/Grafana monitoring, deploying the team's application onto Kubernetes.

CodeArena — Competitive programming platform, team of 5

March – May 2026

Spring Boot · Angular · WebSockets · Stripe · Auth0/JWT · SonarQube github.com/AdamZahi/CodeArena

- Owned the shop module end to end: Stripe payments, real-time WebSocket notifications and pricing, and a loyalty and coupon system; secured with JWT identity, @PreAuthorize and Angular route guards.
- Led integration of teammates' modules and brought the codebase through a SonarQube quality gate: 0 bugs, A security and maintainability ratings, 85% test coverage.

EngageLab — Campaign optimisation

2024 – 2025

- Cleaned and prepared a real Kaggle dataset, then compared decision trees, random forest, XGBoost and K-Means to select the best model; served results through a Flask dashboard.

Network Security Lab

2023 – 2024

- Designed a pfSense firewall with WAN, LAN and DMZ zones: filtering and NAT rules, key-based SSH administration, OpenVPN remote access verified in Wireshark, and Snort IDS alerts.
- Ran ARP-spoofing MITM attacks on Metasploitable2, scanned with Nmap and Nessus; used OpenSSL.

Education and Development

ESPRIT School of Engineering, Ariana, Tunisia

September 2022 – expected 2027

Diplôme National d'Ingénieur (Master's level) in Computer Science, IT Architecture and Cloud Computing specialisation

DevOps training (in progress) — 9antra.tn / Bee Coders: Kubernetes, Terraform, Ansible, Jenkins, ArgoCD

In progress: Cisco Networking Academy — Network Security | AWS Academy — Cloud Foundations

Leadership and Languages

IEEE ESPRIT: WIE Ambassador (2024–25), member since 2023; co-organised Women in Tech (100+) and Pinkathon.

Languages: Arabic (native) | French (B2) | English (B2)
